

Machine Vision and Advanced Image Processing in Remote Sensing

Filesize: 3.04 MB

Reviews

Definitely one of the best ebook We have possibly go through. It usually does not charge a lot of. I am just pleased to inform you that this is actually the greatest ebook i have got study in my own lifestyle and may be he greatest publication for actually.

(Ms. Patsy D'Amore III)

MACHINE VISION AND ADVANCED IMAGE PROCESSING IN REMOTE SENSING

DOWNLOAD

To download **Machine Vision and Advanced Image Processing in Remote Sensing** eBook, make sure you refer to the web link under and download the ebook or have accessibility to other information which are relevant to MACHINE VISION AND ADVANCED IMAGE PROCESSING IN REMOTE SENSING book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of Concerted Action MAVIRIC (Machine Vision in Remotely Sensed Image Comprehension) | Since 1994, the European Commission has undertaken various actions to expand the use of Earth observation (EO) from space in the Union and to stimulate value-added services based on the use of Earth observation satellite data. By supporting research and technological development activities in this area, DG XII responded to the need to increase the cost-effectiveness of space derived environmental information. At the same time, it has contributed to a better exploitation of this unique technology, which is a key source of data for environmental monitoring from local to global scale. MAVIRIC is part of the investment made in the context of the Environment and Climate Programme (1994-1998) to strengthen applied techniques, based on a better understanding of the link between the remote sensing signal and the underlying bio-geo-physical processes. Translation of this scientific know-how into practical algorithms or methods is a priority in order to convert more quickly, effectively and accurately space signals into geographical information. Now the availability of high spatial resolution satellite data is rapidly evolving and the fusion of data from different sensors including radar sensors is progressing well, the question arises whether existing machine vision approaches could be advantageously used by the remote sensing community. Automatic feature/object extraction from remotely sensed images looks very attractive in terms of processing time, standardisation and implementation of operational processing chains, but it remains highly complex when applied to natural scenes. | ForewardIntroductionPART I: IMAGE PROCESSING AND COMPUTER VISION METHODS FOR REMOTE SENSING DATA G. Wilkinson, Recent Developments in Remote Sensing Technology and the Importance of Computer Vision Analysis Techniques; P. Forte, G. A. Jones, Posing Structural Matching in Remote Sensing as an Optimisation Problem; S. Dellepiane,...
