States as a whole is shown by the following: mMU U. S. West South West East Ratio 73. 66. 63. 73. 70 Concentration about the mode 54 49 67 61 58 The cases in the class interval containing the mode, and the cases in the intervals adjacent to the modal interval are included in this percentage. In the following tables the same three class intervals are included for each distribution. The class interval in which the typical ratio value falls, and the class interval on either side contain, therefore, approximately one half, or more, of all of the cases in the respective groups. In other words, three out of thirteen intervals contain 49 or more of all of the ratios of each group. The order of the magnitude of the typical ratios for these geographical divisions is: South 63 West 66 East 70 Middle...
